City of Westover

For Immediate Release

March 24, 2020

I received a phone call today from Stan Graves, Manager of Enviro-Systems, LLC, our local waste-water service provider. He wanted to inform me that Enviro-Systems considers itself a key partner in providing a critical service to Westover and surrounding communities. As such, considering the negative economic effects of the COVID-19 virus, Enviro-Systems will make accommodations for residents who may have lost jobs or have reduced hours. If you are not able to make your payments, it is important that you contact Enviro-Systems through its website https://enviro-systemsllc.com/ or call 205-437-3779, Tuesday thru Thursday, prior to the billing, which takes place at the end of each month.

This is another example of how the City of Westover has been positively impacted by having great civic-minded partners who genuinely care about our City and its customers. The City and Enviro-Systems have had a close working relationship since 2004.

In an effort to find a way to provide reasonable waste-water service for the area, Enviro-Systems has always been responsive to any of our requests. The system currently serves residential and commercial Customers in Westover, Vincent and Harpersville, which includes US Highway and two subdivisions – Willow Oaks and The Villages of Westover.

We look forward to new Customers being served by Enviro-Systems in Yellow Leaf Farms and Pine Mountain Preserve in Westover in the near future and I appreciate the efforts of Stan and his company in addressing the needs of our citizens during these trying times.

Sincerely,
